The two most
powerful words
in the
English language...

Memories
in Video 
A Life Story Conversation

“I wish I could hear my dad’s voice again...”

“I wish I could hear my mom’s laugh...”

*“I am so glad I did this
for my kids and grandkids...”*

NO MORE I WISHES...

A Memories Legacy video removes the “I wish” from your life and replaces it with a peace and happiness that is indescribable. It’s priceless to share your life story with your kids and grandkids, or have a loved one share their life story. Months or years after a loved one passes, there is no greater joy than having the ability to watch your loved one talk to you, laugh with you, and look you in the eye and tell you “I love you”.

Pictures and home movies are wonderful. Yet, they’re not the same as a professionally recorded and edited video that captures the essence, the life story, and the beauty that is your mother, father, or grandparents. An uninterrupted conversation from your loved ones, spoken directly from their heart to you, is priceless. Sadly, once the opportunity to capture such a conversation passes, that opportunity is gone forever...and then you’re back to “I wish”.

HOW IT WORKS

Simply contact us and we will explain the process and set up a time to record your loved one. We will shoot at any location you request. It’s always best to have a family member present while recording, though it is not necessary. We can record a single person or a couple in one session. Sessions are one hour or a half hour. That footage will be edited to either a one-hour package or half-hour package. Our crew is only one person with minimal equipment... no bulky lighting or electrical cables, yet it is broadcast quality video.

Prior to the shoot we will supply a full list of questions you can review. You can use those questions or utilize them as guides. Of course you can ask any questions or let them speak freely.

Once shooting is complete we will edit the video to a half hour or one hour. You may supply up to 12 photographs. These will be divided up and created as a montage at the beginning and end of the video. Once complete, an electronic file of the video will be sent to you to share with anyone you wish. A DVD can also be created if requested.
